HubSpot
CRM

- Manual job tracking in spreadsheets or Trello
- No real-time visibility into job status across departments
- No structured artwork storage or version control
- No centralized reporting or dashboards
- No production efficiency tracking — no idea what's slow or why
- No supply chain or vendor management
- Artwork approval bottlenecks — average 3 days per job via email
- Production floor communication gaps — operators don't know what's next
- Manual status updates via calls and texts — 5–10 customer calls per day
- Errors cascade across disconnected tools — one mistake ripples through every step
- Long delays and costly reprints — rework rate averaging 18% of jobs
- No estimate-to-actual job costing — owners can't see if a job made money
- Quoting takes days — shops lose orders because they can't respond fast enough
- No digital audit trail — if something goes wrong, no one knows who did what
- Customer expects real-time updates — shop has no way to deliver them
- Onboarding new employees is slow — no documented process, all tribal knowledge
- Machines run underutilized because operators don't see what's queued next
- Shipping and delivery not tracked internally — teams find out from customers
- No mobile or tablet access — floor staff have to walk to a desktop to check anything
- Job specs get lost between sales and production — reprints happen before the job even starts
- Paper job tickets get lost, damaged, or ignored on the shop floor

- **6+ separate software tools to run one print job no integration between them**
- **No Visibility**

The Problem Is Enormous & Ignored

73%

Track jobs with paper or spreadsheets

Source: PRINTING United Alliance 2023

$4B

Lost annually to production errors

Rework, waste & missed deadlines

30K+

Print shops in the US with no modern SW

TAM: SMB & mid-market shops

2–3x

Longer job cycle vs. digital-first shops

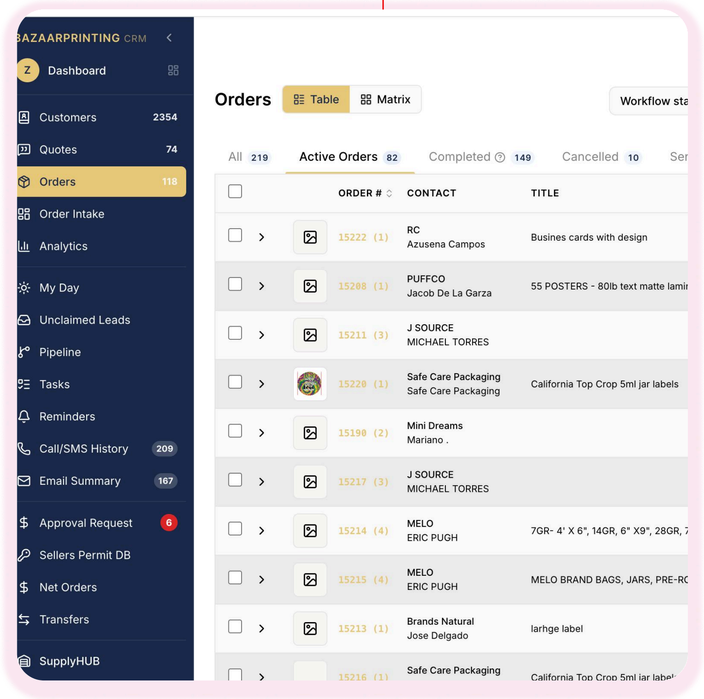

Due to paper-based workflows

Ask

Raising $1.2M Seed Round

18-month runway to 150 paying shops and $1.2M ARR

Step 1: Sign 3–5 early-adopter SMB print shops (pilot cohort)

Step 2: Scale to 150 shops via direct sales and industry partnerships
